Engineering Co. Pvt. Ltd.

Est. 2005

WHY KMS ENGINEERING?

We are the ones who are known and trusted by our esteemed customers for the products highlighted in this catalogue.

KMS Engineering is a leading manufacturing unit in MS/SS Sheet Perforating, Wire Mesh, Conveyor rollers & we cover a wide range of Gear boxes, Rubber beading, Wire mesh clamps, Springs, Tension rods .We are maintaining tradition of quality engineering in the fields of Sheet Perforation, Wire mesh and Conveyor Adler rollers. And for all these type of jobs, we have in-house facility with hi-tech modern machineries.

Skilled workmanship is the major contributing factor which brings utmost quality perfection to the products assuring maximum durability, protection from easy wear-outs and smooth operating techniques. The products are designed and developed to provide full satisfaction to the customers and to return the total value of their money invested in our Products.

KMS FAMILY

WE BELIEVE IN BUILDING A BETTER FUTURE TOGETHER

In order to expand the brand value of our business and unleash the full potential of our employees, we see the future as one of continuous optimization, adoption of lean engineering practices, keen business focus and nurturing trusting partnerships with our customers and vendors.

Quality

*We believe that quality is never an accident, It is always the result of intelligent efforts. That extra effort is what makes **KMS Engineering** serve best quality in this field.*

Experience

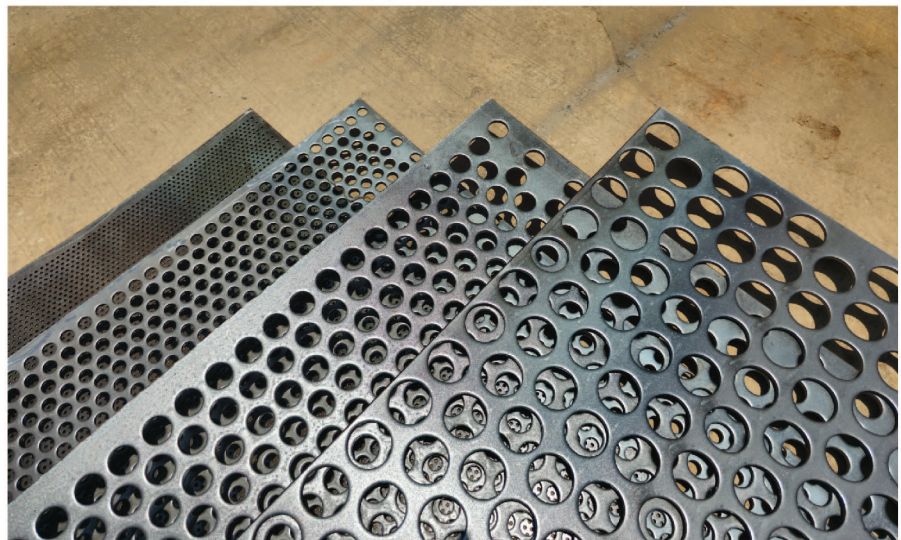

*We have had the hold of this market since 2005 leaving **KMS Engineering** with an experience and intelligence built over an evolving span of more than 18 years in this industry.*

Service

***KMS Engineering** has largest inventory of Ready Stock Crusher Spares, waiting to be shipped. Our emergency response team, including our logistic partners, strive hard to even ensure same day shipments.*

PERFORATED SHEETS

MS PERFORATED SHEETS

It is extensively used in Crushers, Minings and Food Industries, Oil Refineries, Furnitures and Decor etc.

We specialize in custom manufacturing of MS/SS Punching Sheets in various dimensions.

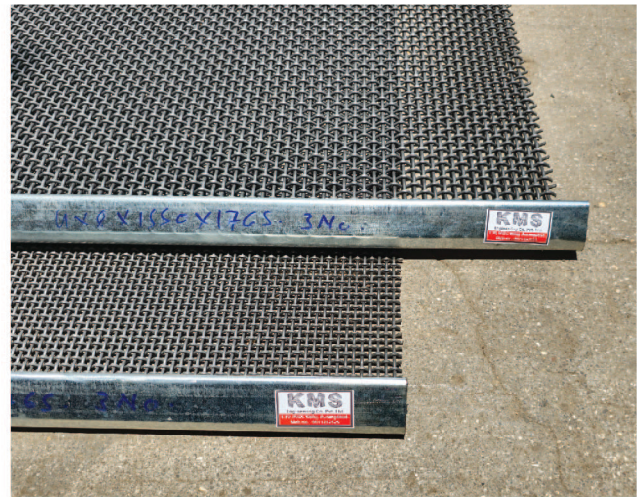

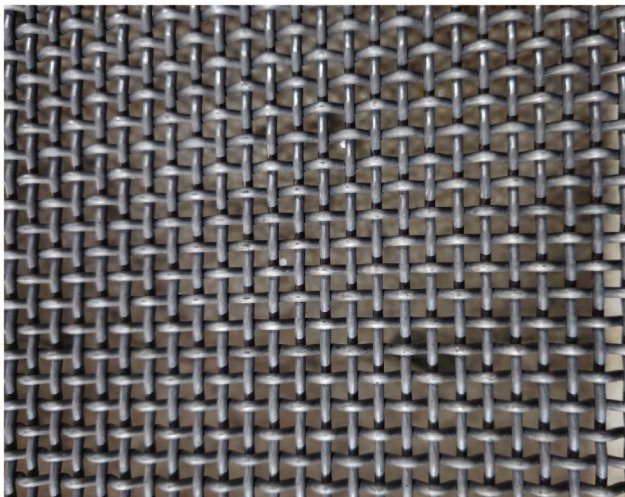

KMS ENGINEERING Manufactures, using latest technology for superior Quality and Durability.

WIREMESH

HEAVY WOVEN WIREMESH

KMS ENGINEERING offers a wide range of woven wire mesh in various materials as per our customer specifications. Woven wire mesh is available in Mild Steel, High Tension Spring Steel, Stainless Steel (304 & 316 Grade) and various other materials.

High quality steel wires (TATA Wiron) are used to manufacture highly durable Wire Mesh with a solid construction, extremely versatile, easy to install & can have low resistance to wind loads. Heavier woven wire mesh is pre crimped so that material remains stable and rigid after the crimping process.

CONVEYOR ADLER ROLLER

CARRYING ROLLER

Carrying rollers are used to support the conveyor belt and are installed on the groove shape frame. Rollers include high quality bearing, multi-labyrinth sealings, greased and sealed for better life and critical specifications essential for high performance.

IMPACT ROLLER

They are used as carrying rollers instead of normal steel rollers at the loading point. On steel roller there are rubber rings assembled side by side to absorb the weight and impact of material falling onto the belt. At the same time impact rollers reduce the shock and vibration through the steel structure.

CONVEYOR BELT

CONVEYOR BELT

We have the widest range in the industry, with belt widths up to 3200mm, conventional fabric reinforced belts, steel cord belts, kevlar belts, pipe belts, sidewall belts, heat resistant belts suited upto 300 Deg C, and many more products in our large basket.

(referring image 1)

CHEVRON CONVEYOR BELT

This range is designed and developed for providing desired space saving on steep inclines which can go up to 40 Degrees. These belts are designed to deliver enhanced load carrying capacity in bulk with lump size of up to 150mm.
